Deluxe Tube Fly Box	

## POWDER PAINTS

### [Powder Paints](#)

Product Sheet

[Index](#)

1. Place your metal tube on the tip of your steel needle.
2. Heat the metal tube approximately one inch above an open flame for about 30-45 seconds.
3. Dip your tube into the Powder Paint. Shake off any excess paint.
4. The paint will stick to the metal tube. If it looks a bit patchy or rough in texture, place back over the flame until it becomes shiny and smooth. The tube should harden and cool in less than 2 minutes.
5. For extra durability, (though not usually necessary), coat the painted area with clear nail polish.

## FINNISH SNOW RACCOON

Product Sheet

[Index](#)

### **Finnish Snow Raccoon**
